

SOCC CQB

TROY DEFENSE

(866) 788-6412

www.shootingindustry.com/company/troy-defense

A new line of firearms and upgrades, the **SOCC** (Special Operations Compatible Carbines) family of products, has been introduced by Troy. Of the three firearm models available, the 5.56mm NATO SOCC CQB features a 10.5-inch barrel, Troy Tomahawk stock, Geissele G2S trigger and new front and rear folding battle sights with lower profiles. The ambidextrous safety selector provides increased accessibility, faster controllability and enhanced safety for the user. The CQB measures 25 inches collapsed and 29.5 inches extended. The SOCC Carbine model has a 14.5-inch pinned and welded barrel and is 33.5 inches extended. The SOCC PDW has a 7.5-inch barrel, Claymore muzzle brake and is 25.75 inches extended.

FLYING CIRCLE BAG

(800) 344-7252

www.shootingindustry.com/company/flying-circle-bag

The **PECOS TACTICAL BACKPACK** has been added to the Flying Circle Bag line of Concealed Carry Backpacks. Constructed from durable water-resistant 900 denier polyester fabric, the Pecos provides functionality and comfort in a sturdy design tough enough to withstand demanding use. It features a large zippered front pocket and two spacious large center compartments. The interior organizer panel has multiple pockets for small items as well as a large pocket with a divider for a tablet or laptop. A sleeve can accommodate hydration systems up to three liters and has dual exit ports for tubes. Two secret back pockets on each side provide secure concealed carry access for handguns up to full-size pistols. MOLLE webbing on the front, sides, bottom and backpack straps can be used to attach compatible packs and gear. It is available in black or coyote brown.

FLIR SYSTEMS

(877) 596-6115

www.shootingindustry.com/company/flir-systems

New from FLIR Systems is the **HELIOS** family of thermal imaging bi-oculars. Ideal for sustained viewing periods and improved depth perception, the Helios features thermal night vision, rugged construction, integrated digital magnetic compass and inclinometer and simple controls. The water- and fog-resistant models are available in magnification ranging from 2x to 5x and are powered by two CR123 batteries for up to four hours.

CANNAE PRO GEAR

(562) 349-0562

www.shootingindustry.com/company/cannae-pro-gear

The **TRIPLEX ACIES 3-GUN BAG** from Cannae Pro Gear is a case adept for 3-Gun competitors or for students taking a class at the range. It's complete with an eye protection carrier, hearing protection pouch and enough room for two long and two pistols. The Triplex Acies comes standard with a shoulder carrying strap and built-in concealable shoulder harness.

YANKEE HILL MACHINE CO.

(877) 892-6533

www.shootingindustry.com/company/yankee-hill-machine-co

Yankee Hill Machine has released the **TURBO**, a new quiet, lightweight 5.56 suppressor. The TURBO utilizes a tubeless design made from heat treated 17-4 stainless steel along with a heat treated 718 Inconel blast baffle, which allows it to be full auto rated. It's 6.5 inches long, weighs 13.5 oz. and has a threshold of 140 dB.
